

A Reminder to Wilton Families...

When Your Child is Sick:

To safeguard the health of all students, we ask parents/guardians to monitor their children for possible communicable diseases and follow these recommended guidelines.

Students should stay home from school if they:

- Have a fever of 100 degrees or greater
- Have an undiagnosed rash
- Have vomited in the past 24 hours
- Have diarrhea more than once in the past 24 hours
- Have copious yellow/green mucus discharge from the nose
- Have a severe sore throat with symptoms indicating possible strep throat
- Complain of severe earache, with or without fever
- Have conjunctivitis (pink eye) with discharge
- Have a skin wound, sore or lesion that appears infected, e.g., is red, swollen, or draining fluid
- Have a communicable illness

Students should remain home:

- For 24 hours fever free without anti-inflammatory medication
- For 24 hours after vomiting has ended
- For 24 hours after the first dose of medication with a diagnosis of strep throat, to prevent spread to other students
- For 24 hours following treatment for bacterial conjunctivitis or conjunctivitis with discharge

Your child's health and that of his or her schoolmates will be best served if everyone follows these guidelines.
