

### **Physical Education Medical Excuse Procedures**

A Student who is injured or ill and is unable to perform physical education activities and fitness exercises must provide a medical excuse note from his/her physician. The medical excuse and its duration are determined by the physician's note. Before the student can resume class participation, a physician's note is required to clear students to participate in all physical activities and fitness exercises.

*If a return date was not provided in the original note, then an additional note granting clearance is required.*

A student who presents a medical note excusing them from Physical Education must report to the Health Office with the physician's note prior to their physical education class.
